

# Complete your Skype for Business deployment with hosted VOIP services

## Transform your organization's communications and productivity

Teligent<sup>®</sup>IP helps you add phone services to your Skype for Business deployment to transform it into a fully featured UC environment (phone + pc communications). Our service has been designed for full integration with Office 365<sup>®</sup> from Microsoft.

Delivered as a cloud hosted service, you will enjoy quick deployment timeframes and consistently excellent call quality without the high costs or maintenance of deploying your own server infrastructure. America's #1 enterprise UC solution is Microsoft's Skype for Business. Teligent<sup>®</sup>IP helps you realize its full value by providing full connectivity to the public switched telephone network along with unlimited national calling. No matter if you are new to unified communications (UC) or looking for a way to quickly jumpstart, supplement, or upgrade your current on-premises solution, Teligent<sup>®</sup>IP is here to help.

With Microsoft's Skype for Business at the core, Teligent<sup>®</sup>IP provides a comprehensive communications platform that includes phone calls, emails, audio and web conferencing along with the ability to integrate with business and customer information.

## Deploy Skype for Business with VOIP without the hassles of server deployment or maintenance.
