

BUSINESS CONTINUITY

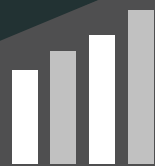

CONTROL TIME

You control your communications at any time, whether it is managing follow the sun routing or to instantly relocate your business with our extensive disaster recovery capabilities.

In the event of a natural calamity, TeligentIP's Business Continuity solutions enable enterprises to automatically re-route calls in seconds from any location to any location or any device, including landline phones, mobile devices and PC-based softphones to maintain telephone service.

DISASTER RECOVERY

CONTROL TIME

This disaster recovery solution includes simultaneous and/or sequential ringing to multiple locations, support for telecommuting, unified voice messaging and single mailbox across multiple technologies which are all fully accessible during disasters or when you need it most. Our geo graphic redundancy ensures no single point of failure during such an occurrence.

With TeligentIP's advanced Business Continuity technology, you retain full control of your mission critical communications from any location regardless of the political, social, or unexpected environmental events that may occur in your area you can remotely redirect and redeploy to anywhere.
